The time is now past, if it ever existed, when he looked forward to the possibility of a third term, and if he thought \$50,000 not too much for himself he could not approve a bill limiting the compet of his successor to one-half that sum. In his message he says that the salary was \$25,000 we had a population of only three millions ; that now we have forty millions, and wealth and cost of living are largely increased. These are facts which the penny-wise economists cannot dispute. Fifty thou sand dollars per annum is not a sum too great to support the dignity of the Presidential office.
